

PROCUREMENT & SUPPLY MANAGEMENT

September 2016 – September 2021

Total funding: \$30 million

USAID's Global Health Supply Chain Procurement and Supply Management (PSM) project employs cutting-edge technologies and commercial best practices to increase the efficiency of health supply chains. The project ensures an uninterrupted supply of health commodities to people around the world, supporting U.S. global public health initiatives.

In Angola, PSM provides technical assistance to government ministries involved in public administration, financial management and other areas that play a role in strengthening health systems. Technical assistance to the Government of the Republic of Angola focuses primarily on support to the Ministry of Health and the Central Procurement Agency for Medicines and Medical Supplies Central Medical Store (CECOMA).

ACTIVITIES

- Support Ministry of Health and CECOMA through PEPFAR, PMI, and family planning and Reproductive Health) assisting in the further development of Government of the Republic of Angola institution building
